

Logitanks is a company specialized in the transport of liquids in tank-containers (ADR/ATP). We transport all kinds of containers and all types of goods, having semi-trailers of all sizes and authorized for A.D.R. goods. [In addition to offering services for tank heating, transfers, flexis and liner assemblies, and container storage.](#)

Logitanks is committed to the Safety of Operations, the Health and Safety (OSH) of employees, the Protection of the Environment and the prevention of pollution, as well as the Quality of the services provided, the Protection of goods, people, goods and facilities, the protection of data (physical and Information and Communication Technologies) and compliance with Corporate Social Responsibility. Integrating them at all levels of the organization.

In order to fulfill this commitment, Logitanks must:

- Determine and provide the necessary resources, both material and human, in order to implement and maintain the Quality, Environment, [Occupational Health and Safety, and Road Safety System](#) and continuously improve its effectiveness.
- [Provide safe and healthy working conditions for the prevention of work-related injuries and health impairment.](#)
- [Eliminating hazards and reducing OSH risks](#)
- To offer quality services that comply with legal and regulatory requirements and meet the expectations of our clients. In addition to complying with the applicable legislation on quality, environment, occupational risk prevention and [road safety](#), and with other requirements that the Company subscribes to. To do this, we will take into account our context, the legislation that applies to us, and the requirements of our customers.
- The prevention and minimization of the environmental impacts of our activities and services, as well as those of our collaborators. Suppliers. Carriers. subcontractors and in general the rest of all interested parties, integrating them into our company as our own activity and monitoring their correct management. Establishing supplier requirements and targets related to Greenhouse Gas Emissions.
- [Enhance consultation and participation of workers and workers' representatives.](#)
- Continuously improve the effectiveness of the Quality, Environment, [Occupational Health Safety and Road Safety System](#), through the mechanisms established in the management system, in particular the continuous training of the organisation's staff and through the appropriate management of complaints and non-conformities.
- [Allocate the necessary resources for the maintenance and continuous improvement of high standards in occupational health and safety, quality, environment and road safety.](#)
- Promote the use of the process approach and risk-based thinking, identifying and considering risks and opportunities that may affect the compliance of products and services and the ability to increase customer satisfaction. In addition, Logitanks, after analysing the context of the organisation, the requirements of the stakeholders, will identify the risks and opportunities related to significant environmental aspects, the applicable legal requirements, the voluntary obligations

assumed in environmental matters, in order to plan the actions aimed at addressing these risks and opportunities.

- To promote, among the staff of LOGITANKS S.L. the importance of complying with the requirements of the client and ensuring their satisfaction with our service, as well as the protection of the environment.
- Promote the awareness of all the group's personnel in the understanding and acceptance of this Quality, Environmental, [Health and Safety at Work and Road Safety Policy](#).
- Hold LOGITANKS workers accountable for the prohibition of taking drugs and alcohol, or being under the influence, during their workday.
- [Prevent and control conditions related to occupational safety and health, in order to minimize the occurrence of occupational accidents and diseases](#)
- Ensure compliance with the requirements of Corporate Social Responsibility (CSR), integrating social, labor and human rights together with occupational health and safety (OSH), environmental and governance concerns in the operations that Logitanks carries out and in the relationships with our partners. To this end, it will implement the necessary procedures to guarantee fundamental human rights, working conditions and hours, and non-discrimination. freedom of association, prohibition of persons working below the minimum age required by law, fair business and ethical business (e.g. against corruption and bribery, conflicts of interest, fraud, money laundering, anti-competitive practices).
- Protect people, safeguard the integrity of High Value and Dangerous Products, against loss due to intentional destruction or theft, as well as the custody of the information provided in any medium by third parties that act with the organization (Customers, suppliers, workers).
- To have the necessary ICT tools to safeguard the information of our customers and suppliers, as well as our communication channels, guaranteeing our service in full.
- The implementation of the BBS program, which aims to increase safety during activities by positively influencing the attitudes and behaviors of operators/drivers through observation, personalized training, communication and feedback, is therefore considered a basic pillar within the company's Health and Safety policy.
- Promote continuous training and awareness aimed at raising awareness and making all staff responsible for quality, satisfaction and customer service.
- Environmental protection and OSH in order to achieve excellence in the conduct of our business.
- Review and modify, if necessary, this corporate policy on a regular basis, ensuring that all the sections set out are still in force, that its content is consistent with the company's objectives, as well as with the expectations and needs of our customers.
