

Logitanks is a company specialized in the transport of liquids in tank-containers (ADR/ATP). We transport all kinds of containers and all kinds of merchandise, having semi-trailers of all sizes and authorized for A.D.R. merchandise.

Logitanks is committed to the Safety of operations, the Safety and Health (SST) of employees, the Protection of the Environment and the prevention of pollution, as well as the Quality of the services provided, the Protection of goods, people, goods and facilities, data protection (physical and information and communication technologies) and compliance with Corporate Social Responsibility, integrating them at all levels of the organization..

To fulfil this commitment, Logitanks:

- Determine and provide the necessary resources, both material and human, to implement and maintain the Quality and Environment System and continuously improve its effectiveness.
- Offer quality services that meet legal and regulatory requirements and meet the expectations of our customers. In addition to complying with the applicable legislation on quality, environment, and occupational risk prevention, and with other requirements that the Company subscribes to. To do this, we will consider our context, the legislation that applies to us, and the requirements of our customers.
- The prevention and minimization of the environmental impacts of our activities and services, as well as those of our collaborators. providers. carriers. subcontractors and in general the rest of all interested parties, integrating them into our company as its own activity and monitoring their correct management. Establishing requirements for suppliers and objectives related to greenhouse gas emissions.
- Continuously improve the effectiveness of the Quality and Environment System, through the mechanisms established in the management system, in particular the continuous training of the organization's personnel and through the adequate management of claims and non-conformities.
- Promote the use of the process approach and risk-based thinking, determining, and considering the risks and opportunities that may affect the conformity of products and services and the ability to increase customer satisfaction. Likewise, Logitanks, once the context of the organization and the requirements of the interested parties have been analysed, will identify the risks and opportunities related to the significant environmental aspects, the applicable legal requirements, the voluntary obligations assumed in environmental matters, to plan actions to address those risks and opportunities.
- Promote, among the staff of LOGITANKS S.L. the importance of meeting customer requirements and ensuring their satisfaction with our service, as well as environmental protection.
- Promote the awareness of all group personnel, in the understanding and acceptance of this Quality, Environmental and Health and Safety Policy.

- Hold LOGITANKS workers accountable for the prohibition of taking drugs and alcohol, or being under their influence, during their working hours.
- Ensure compliance with the requirements of Corporate Social Responsibility (CSR), integrating labour and human social rights together with concerns of safety and health at work (OSH), environment and governance in the operations that Logitanks carries out. out and in relations with our interlocutors. For this, it will implement the necessary procedures to guarantee fundamental human rights, working conditions and hours, non-discrimination. freedom of association, the prohibition of persons working under the minimum age required by law, fair business and ethical business (for example, against corruption and bribery, conflicts of interest, fraud, money laundering, practices contrary to competition).
- Protect people, safeguard the integrity of High-value and Dangerous Products, against loss due to intentional destruction or theft, as well as the custody of information provided in any medium by third parties that work with the organization (Customers, suppliers, workers).
- Have the necessary TIC tools to safeguard the information of our customers and suppliers, as well as our communication channels, fully guaranteeing our service.
- The implementation of the BBS program that aims to increase safety during activities by positively influencing the attitudes and behaviours of the operators/drivers through observation, personalized training, communication, and feedback, and that is why It is considered a basic pillar within the company's Health and Safety policy.
- Promote continuous training and awareness aimed at making all staff aware and responsible in matters of quality, satisfaction, and customer service. protection of the environment and OSH to achieve excellence in carrying out our activity.
- Review and modify, if necessary, this corporate policy on a regular basis, ensuring that all exposed sections remain in force, that their content is consistent with the objectives of the company, as well as the expectations and needs of our customers.
